

## MHA Mission, Vision & Values

### **Mission**

The mission of the Master of Health Administration (MHA) program is to prepare early and mid-careerists in advanced health care management principles, concepts and applications in a multi-modal online learning environment designed for working professionals. Our theory-to-practice model provides a well-rounded foundational knowledge base and fosters the development of skills and abilities through application and simulation. A focus on competency development, professional growth and career advancement promotes the principle of life-long learning for students and faculty. Graduates of the program will possess the enhanced knowledge and advanced competencies enabling them to demonstrate leadership in health care organizations throughout the region, state, and nation.

### **Vision**

The vision of the MHA program is to be a preeminent, online Master of Health Administration program in health management and administration in the United States that is recognized for the skills, knowledge and competency of our graduates, and for the excellent online teaching and scholarly contributions of our faculty.

### **Values**

In fulfilling our mission and pursuing our vision, the MHA Program will:

1. Support a commitment to honesty, integrity, and professional and ethical behavior.
2. Seek quality, innovation, and excellence in our program, faculty, and student efforts.
3. Cultivate meaningful online student-faculty relationships so that each can learn, grow, and be fulfilled in their work.
4. Maintain a supportive, collegial learning environment that respects individuals and their uniqueness, preserves academic freedom, promotes lifelong learning, and values the experience, knowledge, and skill sets that working adults bring to the program.

5. Foster a culture of leadership excellence through modeling, mentoring, and by providing opportunities for students to apply theories, concepts, and principles.
